

Front Door and Locks

1. Please find the front door key in a mini safe box on the cottage wall to the right of the door. All our guests receive the safe box code by e-mail.
2. To open the safe box, pull down the safety shutter and set the 4 digits of the code in one line. Pull down the lever to the left of the code. The door of the safe box will open.
3. To unlock the front door, put the key in the lock and turn it anticlockwise against stop. After that push down the door handle. Pull the door open.
4. If you have difficulty unlocking the door, please contact the Administrator at +358 44 742-3045 (WhatsApp). Internet connection is always available outside the cottage.
5. To fix the front door in the open position, push the door handle down against stop and turn the grey plastic latch on the end of the door into the lowermost position. This will prevent the door from locking itself.
6. We recommend always keeping the key in the safe box in case the front door accidentally locks. There is a 15 euro charge for calling in the technical service to open the door.
7. Please leave the front door key in the safe box upon vacating the cottage. There is a 40 euro charge in case of a lost key.
